**Importance:** High

Good afternoon,

I would like to nominate myself for the Regional Stakeholder Group working to identify the potential list of Marine Protected Areas in Southern California.

I am the President of La Jolla Friends of the Seals, we are a docenting organization that actively promotes education of the public about our marine habitat.

I want to help identify the appropriate areas that would meet the criteria and provide the greatest benefit to both the wildlife and the public.

It is necessary that the commercial and private fisherman understand that these protected areas will increase overall fish populations and actually promote their sport.

Please call me if you would like to discuss,

Thanks  
Jerry Horna  
President, La Jolla Friends of the Seals
